

CISA[®] EXAM REVIEW COURSE

Certified Information Systems Auditor (CISA[®])

Why attend this course?

- For participants who are preparing for the exam
- Use both the official ISACA exam preparation materials, including both presentations and mock examinations, as well as customized presentations from individual instructors
- Taught by leading professionals with years of practical experience in information systems auditing

Why Certified?

ISACA[®] is a world-leading, global association that supports IT professionals with outstanding opportunities for professional growth and development. Professionals worldwide consider ISACA a key partner in delivering value to their enterprise and enhancing their career. Becoming ISACA-certified confirms your knowledge and experience and allows you to demonstrate you have the expertise to identify and overcome current and future business challenges. Independent studies continue to report that holding an ISACA designation:

- ✓ Positions IT professionals for top pay premiums
- ✓ Enhances recognition and professional credibility
- ✓ Is a deciding factor in the hiring process

Instructors

Pierre Herbst has over 30 years of audit, technology, and staff management experience across various industries, including senior external and in-house leadership roles. His most recent role was as the Regional Head of Morgan Stanley Internal Audit for Asia, overseeing both operational and IT audits.

Freeman Ng is the Principal Consultant of iSystems Security Limited with 30 years of IT experience. He provides information security consulting to financial institutions and multinational corporations in Hong Kong, Macau, and China. Prior to the current position, Freeman has hands-on IT technical and risk management experience in world-class banking, financial institutions and multinational corporations, including Standard Chartered Bank, Unisys and NEC. He has proven track records of delivering quality IT assessment and audit, penetration testing, incident response and digital forensics for the leading organizations in the region based on international standards and industry best practices of ISO 27001, ISO 20000, PCI DSS, HKMA, SFC, MAS, NIST, etc.
